5 MAINTENANCE AND UPKEEP

Scent diffusers require regular cleaning and maintenance every 1-2 months when in normal use. Below is the method for cleaning.

◆ Spray nozzle cleaning

* Use 95% "alcohol + cotton swab" to gently wipe the nozzle, removing the residue of oil liquefaction

* Cleaning the atomizer core can be cleaned by soaking a cotton swab in 95% alcohol and wiping the core with it, or by soaking the atomizer core in alcohol and then allowing it to dry.

◆ Oil bottle cleaning

* Before changing oils each time, clean the oil bottle with alcohol and allow it to dry completely.

When equipment is not used for a long period, it is necessary to clean the internal nozzles and other components thoroughly.

* Add 95% industrial alcohol to the empty bottle.

* Turn on the device and run it for 10-15 minutes.

* Turn off the device, pour out the alcohol from the bottle and let it dry before reassembling the device.

* Power off storage, unplug the power supply, to prevent electrostatic damage to the circuit.
